PROFILE SUMMARY

Cybersecurity enthusiast and Mathematics & Computer Science graduate with hands-on experience in security monitoring, SIEM deployment, cloud security fundamentals, and Python automation. Skilled in log analysis, threat detection, vulnerability assessment, and security-focused problem solving through practical projects using Wazuh, Kali Linux, Microsoft Azure, and Python. Passionate about protecting systems, investigating security events, and continuously building practical cybersecurity skills.

EDUCATION

Kenyatta University, Nairobi July 2024

Bachelor of Science (Mathematics and Computer Science)

Relevant coursework: Computer Networks, Database Systems, Operating Systems, Data Structures & Algorithms, Object-Oriented Programming, Information Systems, SQL Database Management, Python Programming.

EXPERIENCE

Freelancer, Nairobi March 2023 – September 2024

Data Analyst

- Collected, cleaned, and analyzed datasets to support informed decision-making.
- Developed interactive Power BI dashboards to support data-driven decision-making and improve reporting efficiency.
- Used SQL and Excel to extract, transform, and analyze business data.
- Communicated analytical findings to stakeholders in a clear and actionable manner.
- Managed multiple projects while meeting deadlines independently.

United Nations (WFP), Nairobi March 2024 – April 2024

Mentorship

- Strengthened communication, teamwork, and organizational skills.
- Engaged in professional mentorship and collaborative learning initiatives.
- Developed communication, networking, and teamwork skills through interaction with professionals and peers.

PROJECTS

Python-Based Security Monitoring System June 2025

- Developed a centralized monitoring solution for analyzing system logs and security events.
- Implemented automated alerting and reporting features.
- Strengthened skills in troubleshooting, system monitoring, and technical documentation.

Cloud Security Monitoring Project April 2025

- Implemented a cloud-based monitoring environment to collect and analyze network activity.
- Generated insights from observed attack patterns using data analysis techniques.
- Strengthened skills in cloud technologies and system monitoring.

Port Scanner March 2025

- Built a Python-based network scanning tool capable of identifying open ports and active services across test environments.
- Implemented TCP and UDP scanning functionalities with multithreading support to improve efficiency.
- Conducted controlled testing against local virtual machines to strengthen understanding of network exposure and security assessment concepts.

COVID-19 Global Data Tracker

- Analyzed large-scale public datasets using Python and Pandas.
- Developed visual dashboards and reports to communicate key trends.
- Applied statistical and analytical methods to generate actionable insights.

SKILLS

Core Competencies: Security Operations, SIEM Monitoring, Threat Detection & Log Analysis, Incident Investigation, Vulnerability Assessment, Microsoft Azure Fundamentals, Identity & Access Management, Python Scripting, Windows Administration, Network Security, Cloud Security, Risk Assessment, Technical Documentation, Problem Solving, Team Collaboration

Programming: Python, SQL, C++

Cybersecurity Tools: SIEM (Wazuh/Elastic), Kali Linux, Wireshark, Burpsuite

Cloud & Platforms: Microsoft Azure, GitHub

Data & Reporting: Power BI, Microsoft Office, Google Docs

CERTIFICATIONS

CyberShujaa Women's Cybersecurity Bootcamp - Hands-on cybersecurity training and advocacy for women in technology.

Microsoft SC-900: Security, Compliance & Identity Fundamentals - Foundations in identity management, compliance, and cloud security principles.

Cisco Cyber Threat Management - Incident response, vulnerability management, threat detection, and risk concepts.

Cisco Ethical Hacker - Security assessment, penetration testing, and vulnerability analysis fundamentals.

Growing Leaders Programme - Leadership development, communication, and mentorship training.
